SUMMARY

Software Engineer and Flutter Developer with 3+ years of experience spanning mobile app development, IT operations, and EdTech support. Built and delivered production mobile apps for established organizations including healthcare, field operations, and food delivery platforms. Currently managing servers (Plesk, cPanel), Microsoft 365, Zoom, and Tier-2 IT support for educational institutions across Dubai and KSA, while training educators on STEM and digital tools

SKILLS

Mobile Development	Cross-Platform Development (iOS & Android), Responsive UI
Architecture & State	Clean Architecture, MVVM, Cubit, BLoC, Provider, Repository Pattern, Dependency Injection
Backend & APIs	Firebase (Firestore, Auth, Cloud Functions, FCM, Storage, Analytics, In-App Messaging), REST APIs, JSON, JWT Authentication, OTP / Phone Authentication
Mobile Features	Google Maps, Geolocator, Real-time Chat, Push Notifications, Offline-First Sync, PDF Generation, Image Capture, Digital Signatures, Encrypted Secure Storage
Tools & DevOps	Git, GitHub, Postman, Figma, Android Studio, VS Code
Web & Infrastructure	WordPress, Elementor, cPanel, Plesk, DNS, SSL, Backups
Methodologies	Agile, Scrum, Code Review, Unit Testing
Soft Skills	Problem Solving, Stakeholder Management, Technical Communication, Team Leadership, Client Relations

PROFESSIONAL EXPERIENCE

Oryx Sky Education | Dubai, UAE Mar 2024 – Present

Technical Operations & EdTech Specialist

In partnership with World Knowledge / KSA

- Administered company servers and hosting environments via Plesk and cPanel, managing domains, DNS, SSL certificates, automated backups, and security configurations across Dubai and KSA operations.
- Built and launched WordPress-based websites end-to-end, handling setup, deployment, and handover to the development team for ongoing customization and maintenance.
- Provided Tier-2 technical support to schools and internal teams, resolving issues across Outlook, software installations, laptops, networking hardware (routers, biometric devices), and EdTech platforms.
- Collaborated remotely with the partner team at World Knowledge (KSA) to coordinate technical operations, troubleshoot platform issues, and support cross-border EdTech rollouts.
- Created and administered student and teacher accounts across multiple educational platforms, streamlining onboarding and first-week activation workflows.
- Delivered technical training sessions for educators on robotics, drones, and cybersecurity tools, translating complex technical concepts into classroom-ready use cases.

Lead Flutter Engineer & Client Relations

Portfolio: techtitansdigital.com / Instagram: [@techtitans](https://www.instagram.com/techtitans)

- Co-founded a mobile development studio with a 4-person core team (2 Flutter developers, UI/UX designer, Backend engineer), delivering custom Flutter applications and MVPs to startups and clients across Syria, KSA, and the UAE.
- Architected and shipped multiple production Flutter apps live on the App Store and Google Play, including SuperDriver (4-app delivery ecosystem on the UAE App Store), Monawbaty (healthcare shift booking for 500+ paramedics), Monasbat (KSA tribal events app), and the Atlas Company tablet CRM (Dubai).
- Led the full client lifecycle — discovery calls, requirement gathering, proposals, contracts, delivery, and post-launch support — bridging non-technical stakeholders with engineering teams.
- Integrated Firebase services (Firestore, Cloud Functions, Storage, Analytics, In-App Messaging) and Django REST APIs with JWT authentication and encrypted token storage.

Syrian Computer Society | Homs, Syria

Mar 2022 – Jul 2022

C++ Programming Instructor

- Taught C++ programming fundamentals to students aged 10–18, covering variables, control flow, functions, arrays, and basic object-oriented programming.
- Designed interactive lesson plans and hands-on coding exercises, translating abstract programming concepts into age-appropriate examples.
- Mentored students through debugging sessions and small projects, fostering problem-solving skills and logical thinking.

SELECTED PROJECTS

SuperDriver | Multi-App Food Delivery Ecosystem (Live on UAE App Store)

Flutter • Django REST • Cloud Firestore • Firebase • Google Maps • Clean Architecture

App Store: <https://apps.apple.com/ae/app/superdriver-delivery-hero/id6759180801>

- Co-built a complete delivery platform composed of 4 integrated systems: Customer App, Driver App, Admin App (all Flutter), and a centralized Django-powered Web Dashboard.
- Architected the Customer and Admin Flutter apps using a three-layer Clean Architecture (domain / data / presentation) with Cubit-based state management for scalability and testability.
- Engineered real-time chat between users, drivers, and admins using Cloud Firestore with Cloud Functions, supporting conversation summaries, unread count syncing, and cursor-based pagination.
- Integrated secure JWT authentication, OTP verification, push notifications, Google Maps integration, and bilingual Arabic/English support with full RTL compatibility.

Monawbaty | Shift Booking App for Paramedics

Flutter • Django • Firebase • CI/CD

Originally developed as graduation project, later launched to production.

- Built a shift-booking and scheduling application serving 500+ active paramedics, reducing scheduling conflicts and streamlining shift management.
- Implemented authentication, schedule browsing, and booking workflows with real-time availability updates.

Atlas Company | Field Operations Tablet App (Dubai, UAE)

Flutter • Cubit • Firebase • Google Maps • Clean Architecture

- Designed and developed a Flutter-based Android tablet application from scratch, integrated with the company's CRM to streamline field operations for 50+ on-site employees.
- Integrated RESTful APIs with the CRM backend and engineered offline-first functionality with local caching and auto-sync, enabling uninterrupted work in low-connectivity field environments.
- Implemented image capture, digital signatures, and GPS location tracking to document on-site visits, installations, and customer acknowledgments.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications on task assignments and schedule updates, and generated on-device PDF reports summarizing completed field visits.

EDUCATION

Al-Baath University | Homs, Syria

2018 – 2023

Bachelor of Engineering in Information Technology (IT Engineering)

- **Graduation Project | “Monawbaty” Shift Booking App:** Built a full-stack mobile application (Flutter + Django) for managing paramedic shifts. The project was later refined and launched to production, serving 500+ active paramedics.
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Computer Networks, Web Development.

VOLUNTEERING

Syrian Arab Red Crescent | Homs, Syria

Sep 2018 – Oct 2023

Paramedic & Operations Centre Coordinator

- Served as a certified paramedic for 5+ years, responding to emergency calls and delivering time-critical first-response care under high-pressure field conditions.
- Promoted to Team Leader (2019 – 2022), leading a team of volunteer paramedics across shifts, coordinating field missions, and mentoring newer volunteers on operational protocols.
- Acted as a key link between field teams and central command, ensuring smooth coordination, rapid response times, and reliable data tracking across daily operations.
- Operated the Operations Centre dispatch desk (until 2022), managing incoming emergency communications, prioritizing and dispatching field teams, monitoring ongoing shifts, and maintaining accurate operational records.

Syrian Arab Red Crescent | Homs, Syria

Jun 2023 – Jan 2024

Human Resources Volunteer

- Supported recruitment operations by processing candidates' data, scheduling interviews, and maintaining structured digital records for the HR department.
